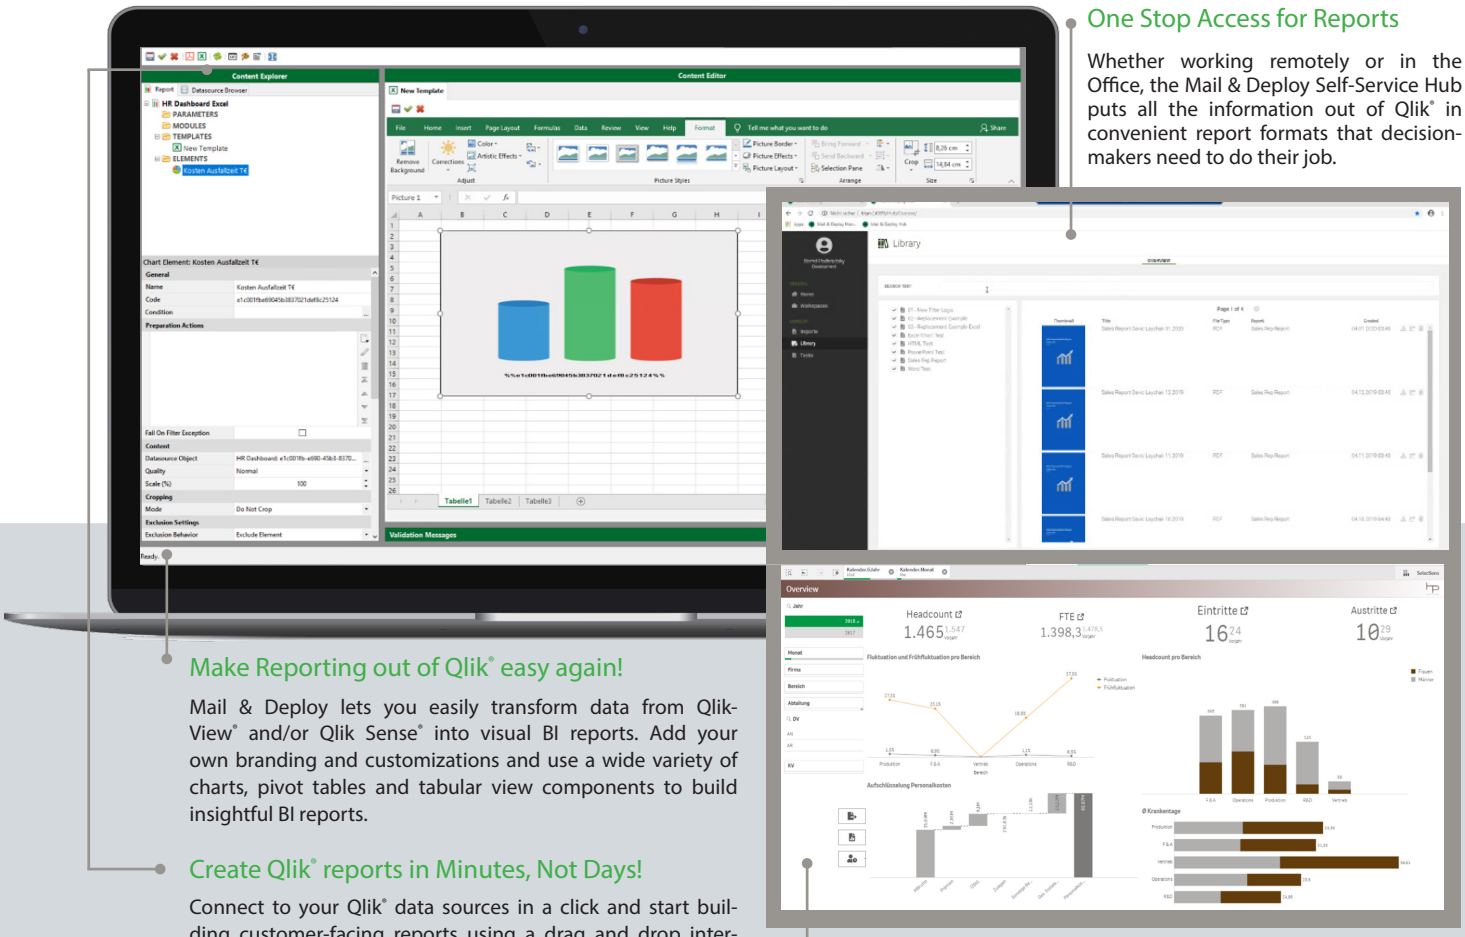
Mail & Deploy

The reporting suite for Qlik®

Mail & Deploy for Qlik®

The modern way of reporting with Qlik Sense® SaaS, Qlik Sense® and QlikView®



One Stop Access for Reports

Whether working remotely or in the Office, the Mail & Deploy Self-Service Hub puts all the information out of Qlik® in convenient report formats that decision-makers need to do their job.

Make Reporting out of Qlik® easy again!

Mail & Deploy lets you easily transform data from QlikView® and/or Qlik Sense® into visual BI reports. Add your own branding and customizations and use a wide variety of charts, pivot tables and tabular view components to build insightful BI reports.

Create Qlik® reports in Minutes, Not Days!

Connect to your Qlik® data sources in a click and start building customer-facing reports using a drag and drop interface in a matter of minutes. Use special features to customize your report content, control report distribution lists, apply filters to view only relevant information, and play with frequency and format.

Self-Service Extension for Qlik Sense®

Help your business users create more accurate reports (e.g. subscribing, requesting reports or exporting report elements/sheets) and find better insights faster with the Mail & Deploy Self-Service Extension.

User Experience:

Mail & Deploy's mission is to enable outstanding experiences for enterprise reporting out of Qlik®. Ensuring consistent reporting is a major pain point for enterprises at scale. Our unique web-based software delivers immediate value starting at the Qlik® power user and working till the report recipient. Optimize utilization and adoption, boost the user experience, and increase productivity in your reporting out of Qlik®.

Real Insights:

Delivering answers, and not just data, Mail & Deploy bridges the gap between reporting and decision and quickly turns Qlik® reports into a highly responsive business asset for all your company's decision-makers.

IT Optimization:

Mail & Deploy is an intelligent reporting system that is dedicated to speedy, successful deployment (one service) on an existing Qlik® environment and gains the maximum value out of it with minimal overhead. The software architecture is designed to conserve valuable IT resources (e.g. memory and server capacity) while offering the best possible reporting performance for a vast number of reports.

Mail & Deploy

Explore the modern way of flexible and powerful automated Qlik® reporting

Mail & Deploy provides a self-service, enterprise BI reporting solution for Qlik®. From report design and creation to sharing and automated scheduling, our solution brings reporting superpowers to Qlik® power users and decision-makers by combining the benefits of workflow automation, visualization and communication. Improve decision-maker satisfaction, extend report life spans, and mitigate the risk of your decision-making with our innovative reporting suite for Qlik Sense® SaaS, Qlik Sense® and QlikView®.

STANDARD REPORTING

Take the complexity out of your reporting by facilitating customizable and intuitive report visualization capabilities for Qlik® users with a centralized rapid standard reporting in popular Microsoft Office formats, HTML, CSV and Adobe PDF. Share the insights via different ways with your internal and external report recipients and ensure information is sent to the right place and can be easily interpreted and used by the recipient.

SELF-SERVICE REPORTING

Empower end-users to analyze their Qlik® data independently by allowing them to subscribe to/create on-demand and receive rapid Qlik Sense® reports via the Mail & Deploy Self-Service extension or Hub. This gives decision-makers the ability to assume control of their analytics needs and improves flexibility and agility within the business departments by providing user independence in their decision-making process.

ALERTING

Always be the first person to know when something important in your Qlik® dashboards changes and get direct insight into your business data via email. Receive data-driven alerts when specified conditions (from simple to complex) are met in your Qlik® data. You define when a condition is met and an alert is triggered and how frequently you want to receive automated notification.

Key Features

- High performant reporting engine streamlined for optimal memory consumption
- Enterprise-ready with installation on-premise and connection to Qlik Sense® apps in the Cloud
- Customize and maintain control over your reports with our advanced features and extensive API
