

Welcome to Mail & Deploy SaaS

The next generation of our fully cloud-based solution helps you to power up your analytics in Qlik®, Power BI, Snowflake and more with flexible and most comprehensive reporting features.

Mail & Deploy SaaS is built on a single platform and designed for companies that are already using cloud-based Business Intelligence Systems and Data Warehouses or who are considering the transition to a cloud-based model. Our cloud-ready reporting suite transfers all well-known principles and existing benefits of Mail & Deploy on-premise for high-performant, hassle-free and dynamic reporting to the cloud era.

All-in-one Platform for Broad Reporting!

Mail & Deploy SaaS radically simplifies reporting out of Qlik®, Power BI or any other data source by speeding up the report creation process with intelligent features and offering plenty of possibilities to take report customization to the next level. It provides consistent and comprehensive enterprise-class report design, sharing and distribution capabilities for a broad set of use cases.

Lightning Fast Reports in Minutes, not Days!

With the help of the flexible design options, the sophisticated features related to filtering, automated dispatch etc. as well as numerous integrations of 3rd party extensions and other useful functions, BI users can use Mail & Deploy SaaS to intuitively and quickly satisfy the information needs of decision-makers and managers through convincing reports.

Freedom of Reporting as a Service!

Take advantage of Mail & Deploy delivered as a service. It offers a seamless experience for users to simply log in and start using Mail & Deploy capabilities, without the need to download or install any software. Users have the full range of functions of the classic on-premise solution, but Mail & Deploy takes over the maintenance work in terms of hosting and updates.

Benefits of Mail & Deploy SaaS

Flexible Deployment

Mail & Deploy is an enterprise-ready reporting software that runs on a unified platform and can be easily deployed either on-premise or via SaaS. It can connect to your various data from anywhere and remains adaptable to be in line with your business needs.

Reliable and Secure Environment

With AWS as a cloud provider, we take advantage of a scalable, reliable, and secure global computing infrastructure with SOC-2 compliance standards. AWS maintains multiple geographic regions around the world, helping us bring Mail & Deploy closer to our customers.

No Demand on IT

Your IT department isn't available, or you don't have an IT department? No problem. The operation of Mail & Deploy SaaS is no longer your concern. This responsibility falls on us, allowing you to focus your IT or technology budget elsewhere.

Save Time & Money

Mail & Deploy's cloud-based solution saves time and money by eliminating the need to set up and maintain a server. We handle the implementation and take care of updates so that our customers can focus on their business decisions.

About Mail & Deploy

Mail & Deploy is a product by MaD Reporting GmbH. MaD Reporting GmbH, as a Qlik® Technology Partner, has become a notable player in the BI reporting environment. The company has been developing a proven alternative to other reporting solutions (like Qlik® NPrinting) since 2008.

Mail & Deploy, the flexible and smart reporting suite, offers BI users around the world a unified reporting experience for Qlik®, Power BI, Snowflake, Databricks and more with immense power and advanced features. This single platform is available as an on-premise or SaaS Solution.

With worldwide more than 100 certified resell partners, the company has delivered value to over 200 000 decision-makers, in over 400 enterprises across more than 30 countries, and in most major industry verticals.

Simplify and modernize your Qlik®, Power BI Reporting and more with Mail & Deploy SaaS. Learn more at www.mail-and-deploy.com.
